# GLOBAL REVIEW OF SMART CITY STRATEGIES

ARUP **CATAPULT**  
Future Cities

The  
Smart  
City is  
not this.

It needs  
some of  
this.

- Better services and places
- Promotion and attracting investment
- Creating an equitable, inclusive city
- Citizen engagement and transparency
- Environment and sustainability

ARUP

Better  
services  
and  
places.

British mobile phone users' movements 'could be sold for profit'

Hackers could steal users' location data, finding out 'where you are, how you got there and where you are going,' say campaigners

Damien Gayle @damiengayle

Proposiciones por task, barrios ou endereços

Transport Individual not Motorised

- New bike rack
- New post BinAffix
- New waste cycling

mass transit

- New bus stop
- New high-capacity corridor
- New bus terminal

Motorized Individual Transport

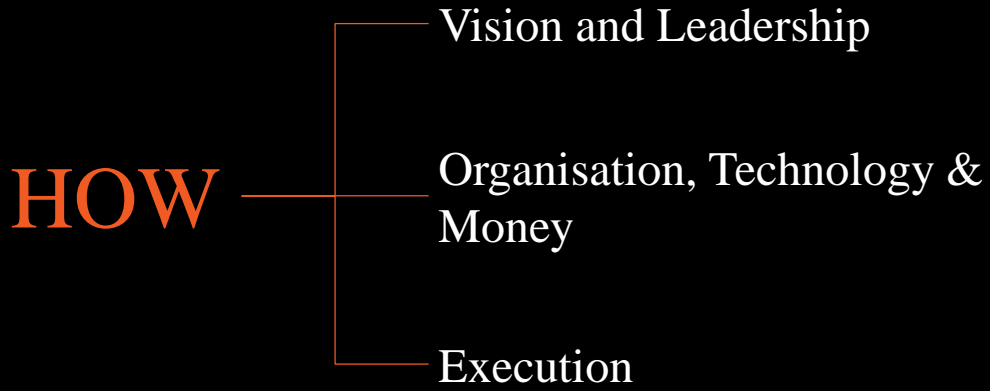

- Reduction of the maximum speed for cars
- Restricting car traffic

Displacement walking

- Sidewalk widening
- New pedestrian crossing
- Sanctuary time adjustment

Rodrigo wants new bus stop in R. Camilo Mendes - Centro Rio de Janeiro - RJ, Brazil

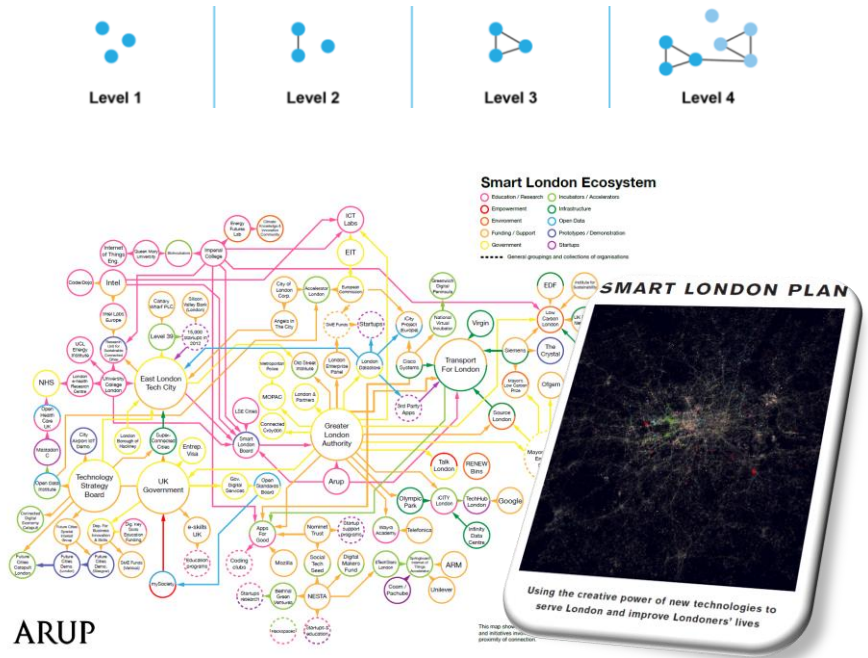

has shown from Santa Teresita to Clara, proposed

Vision and leadership

	Most Cities	London Sydney Barcelona Amsterdam	Singapore New York San Francisco Scandinavian Cities	
<b>Smart City Project Implementation</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Level 4</b>
<b>Soft Infrastructure</b>				
Value Assessment	Individual project business cases	Some non-financial value assessed	Holistic value assessment (social/environmental/financial)	Holistic value assessment supporting diversification of funding sources
Governance	Departmental governance structures	Some cross-departmental collaboration	Cross-departmental 'Smart City' management positions in place	City-wide governance structures and shared performance targets combined with international collaboration
Strategic ICT Focus	Limited ICT capability	Some strategic focus on ICT	ICT vision for the city	ICT vision and strategy overseen by dedicated City CIO
Citizen Engagement with Service Design	Limited citizen engagement	Project-level, basic needs analysis, pilots	Citizen feedback loops established	Citizen participation in integrated service design
<b>Hard Infrastructure</b>				
IT project focus	Little or no ICT projects	Targeted ICT project investments (e.g. Smart Grid)	Integrated ICT investments (including embedded sensing, control and actuation)	Real-time city operations optimisation
Integration of Data Streams	No data integration	Small scale data integration	Creative data mash ups pulling data to a common platform	Open data and crowd-sourcing initiatives
Digital Service Provision	Little or no digital service provision	Handful of digital services	Integrated digital services around the city environment	Diversity of cloud-based citizen services

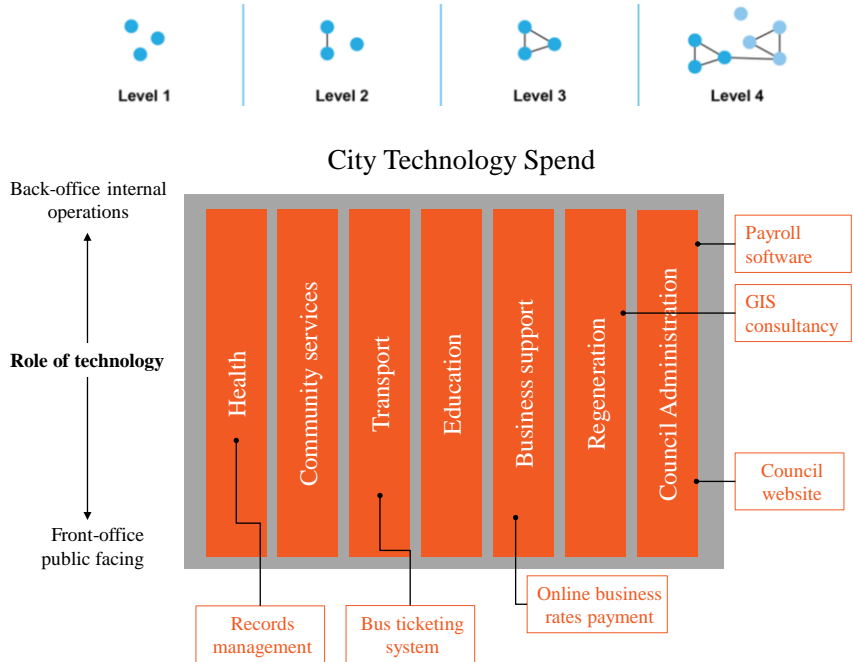

The City starts to understand its role across the ecosystem, not always as the provider of services.

Technology is purchased by departments within its core requirements.

(and we need some silos = organisation)

Example technology

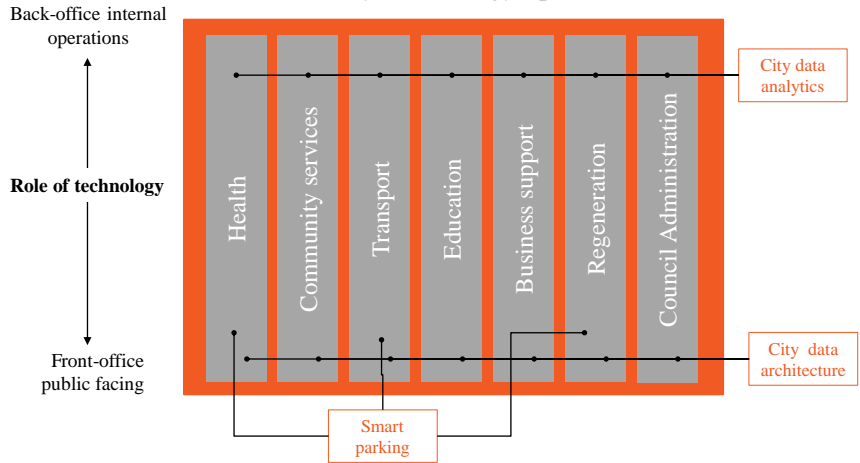

Technology is also being applied across departments and the cities ecosystem.

Example technology

City Technology Spend

Money

IT Spending as a Percentage of Total City Spend

IT Spending as a Percentage of Total Operating Expense
