Local Lift Initiative

Volunteer drivers are being invited to sign up to Clare Local Lift, a new pilot initiative aimed at reducing rural isolation. Do you want to know how you can have a positive impact on your community?

Isolation

In the absence of public and private transport, many rural areas are being marginalised and left behind.

Community

Rural communities need to be economically active and socially engaged to have access to quality public services and amenities.

Transport

Connectivity is a key element of rural development. It allows rural communities to participate in the national and global economy.

Older Persons

Older persons are a key demographic group in rural areas. They often face challenges in accessing services and amenities due to their age and mobility.

Who?

- Students returning to College on a Sunday night
- Day care centres with medical appointments
- Post office / Pension collection
- More...

Next:

- Information Evening with Community Group
- Promotion: Media, GAA, Clare Co Co
- Launch Pilot
